If you are responsible for Food Defense compliance, organizational success in daily implementation, and delivering successful inspection results for the Food and Drug Administration (FDA) Food Defense audits that begin in July 2019, ABS Group's Industrial Security Solutions Food Defense team can efficiently and effectively assist your organization with the knowledge, training, and guidance to help your organization achieve its food defense objectives.

As threats to the Food and Agriculture and Industrial Manufacturing sectors continue to grow, and as the challenges for businesses to protect their supply chains increase, implementing a Food Defense program is mission-critical. ABS Group can assist your organization in complying with FDA requirements to develop and implement a Food Defense program in your industrial facilities.

ABS Group's security professionals have over 30 years of combined practical supply chain experience in Intentional Adulteration mitigation and food defense. As former security leaders in the consumer food industry, our experts have worked with the industry trade association from conception, through federal rule draft development and regulatory passage of the FDA Intentional Adulteration Rule. Our experience with senior-level executives and facility management in coaching and providing value-added assessments and guidance helps protect your organization’s vital brands, products and consumers as we align with your organization in implementing a fully compliant Food Defense program.
